PROFESSIONAL SUMMARY

Python Full-Stack Developer with six months of hands-on experience in developing web applications using Python, Django, React.js, JavaScript, and MySQL. Skilled in creating responsive frontend interfaces, developing and testing REST APIs, implementing CRUD operations, and managing relational databases. Strong problem-solving and debugging abilities, with practical experience integrating frontend, backend, APIs, and databases to build real-world full-stack applications.

EXPERIENCE

Full Stack Developer — BDreamz Global Solutions April 2026 – Present

- Develop full-stack web applications using Python, Django, React.js, JavaScript, and MySQL.
- Build responsive frontend interfaces and develop REST APIs with CRUD operations.
- Perform database operations using MySQL and integrate frontend applications with backend APIs.
- Work on end-to-end application development across frontend, backend, API, and database layers.

TECHNICAL SKILLS

Programming Languages: Python,JavaScript, SQL

Frontend: HTML, CSS, JavaScript, React.js, Responsive Web Design, DOM Manipulation Backend &

Frameworks: Django, Django REST Framework

Databases: MySQL Workbench, Database Design, SQL Queries, Relational Databases, Joins, Subqueries

Python, HTML, CSS, JavaScript, MySQL, GitHub, VS Code, IDLE, MySQL Workbench, MS Office PROJECTS

Cine World — Movie Ticket Booking System

React.js, FastAPI, Python, MySQL, JavaScript

- Developed a full-stack movie ticket booking platform supporting movie/theatre browsing, show selection, seat booking, cancellation, payment, and booking history.
- Built REST APIs using FastAPI and integrated a MySQL database to manage users, movies, theatres, show timings, and bookings.
- Implemented user authentication, seat availability validation, and duplicate-booking prevention logic.

Software Defect Prediction System

- Developed a Software Defect Prediction System as a college academic project to identify software modules that are more likely to contain defects.
- Collected and analyzed software-related data and performed data preprocessing to prepare the dataset for prediction.
- Applied machine learning techniques to classify software modules based on their likelihood of containing defects.
- Implemented feature analysis, model training, testing, and prediction using Python.
- The system helps developers identify high-risk modules early and focus testing efforts on areas that are more likely to have defects.

INTERNSHIP

Python Development Intern – Redback

- Completed a Python Development Internship with hands-on experience in Python programming, problem-solving, and application development.
- Worked on developing and implementing Python-based solutions while gaining practical knowledge of programming concepts

Python Full Stack Development Intern – NovieTech

- Completed a Python Full Stack Development Internship with practical exposure to frontend and backend development.
- Worked with Python, web technologies, databases, and application development concepts to build and understand full-stack web applications.

EDUCATION

B.SC— Computer Science 2023 – 2026

Arcot Sri Mahaalakshmi Women's College,Villapakam | CGPA: 8.2

Higher Secondary Certificate — State Board 2023

Government Girls Higher Secondary School,,Thimiri |percentage:7.2

CERTIFICATIONS

Python Full-Stack Development — Besant Technologies

- Completed training in Python, Django, React.js, JavaScript, HTML, CSS, Bootstrap, MySQL, SQL, REST APIs, and CRUD operations, with hands-on experience in full-stack web application development.
